

ASSAM DON BOSCO UNIVERSITY
Modified Course Structure/Syllabus in SPRING 2019

SCHOOL OF TECHNOLOGY
DEPARTMENT OF CIVIL ENGINEERING
MASTER OF TECHNOLOGY (MTECH)- CIVIL ENGINEERING (Construction Engineering and Management)

Type	Course Code	Course Name	Credits	Category
Semester 2				
Theory	CVFI0008	Financing Infrastructure Projects	4	DC
	CVCT0009	Advanced Concrete Technology	4	DC
	CVIP0004	Infrastructure Planning	4	DC
	ECRM0042	Research Methodology and Intellectual Property Rights	2	SC
	Elective II:			
	CVTE0010	Advanced Transportation Engineering	3	DE
	Elective III:			
	CVHR0011	Structural Health Monitoring and Rehabilitation of Structures	3	DE
Total Credits			20	

ECRM0042: RESEARCH METHODOLOGY AND INTELLECTUAL PROPERTY RIGHTS

(2 credits-30 hours)

Objective: This course is designed to help students to identify research problems in various fields. It aims at giving potential researchers the knowledge of effectively analysing and interpreting results and presenting the findings to the scientific and technological community of the world. This course also aims at motivating students to bring about their creative ideas for innovation and establishing research impact in the global fora through intellectual ownership.

Module I Research problem formulation and solution (12 Hours)

Meaning, sources, scope and objective of a research problem; Good research problem criteria and characteristics, errors in selecting a research problem; Research problem solutions– approaches for investigation; Approaches to effective literature studies; Data collection, analysis, interpretation and instrumentation; Plagiarism and ethical practices.

Module II Technical writing (10 Hours)

Effective writing; Research proposal development and its format; Different report types.

Module III Intellectual Property Rights (8 Hours)

- a) Nature of intellectual property: Patent, design, trade and copyright; Patenting and development process; Patent grant under PCT and procedure; Geographical indications.
- b) Patent rights: Administration of patent systems, scope, information and databases, technology licensing.
- c) New developments and case studies.

COURSE / LEARNING OUTCOMES

At the end of this course students will be able to:

CO1: To be able to identify research problems in various fields

CO2: To be able to approach investigations scientifically in order to find solutions for research problems of interest

CO3: To know how to undertake literature review for knowing the state of the art in the areas of interest

CO4: To know how to put forward the research problems, findings, analyses and interpretations effectively

CO5: To know how to take ownership of new findings through intellectual property right laws
